**ACKNOWLEDGMENT OF PERSONAL INFORMATION & EQUIPMENT INSTRUCTIONS**

I have accurately represented the above listed information and it is true and correct. I will not use any of the equipment to be provided to me during this transaction until I have received instruction on its use and I fully understand its use and function. I agree to verify that the visual indicator settings to be recorded on this form for downhill ski equipment agree with the number appearing in the visual indicator windows of the equipment to be listed on this form. I have carefully read, understood and agreed to the terms of the warning, assumption of risk, liability release, indemnity and hold harmless agreement and agreement not to sue on the reverse side of this document.

**Choose Your Skier Type: Selecting Your Skier Type is Your Responsibility!**

Your skier type, height, weight, age and ski boot sole length are used by the shop technician to determine the release/retention settings of your ski bindings. It is important to provide accurate information. Inaccurate information may increase your risk of injury.

Consult the following descriptions to select your Skier Type.

- Type I - Ski Cautiously**
  - Prefer slower speeds.
  - Prefer cautious skiing on smooth slopes of gentle to moderate pitch.
  - Favor lower than average release/retention settings.
- Type II - Ski Moderately**
  - Prefer a variety speeds.
  - Prefer to ski on varied terrain.
  - Skiers not classified as either Type I or Type III.
- Type III - Ski Aggressively**
  - Normally ski at faster speeds.
  - Prefer fast and aggressive skiing on slopes of moderate to steep pitch.
  - Prefer higher than average release/retention settings.
- Prefer an increased risk of inadvertent binding release in order to gain releasability in a fall.
- Entry-level skiers uncertain of their classification.
- Favor average release/retention settings appropriate for recreational skiing.
- Prefer decreased releasability in a fall in order to gain a decreased risk of inadvertent binding release.

If from experience you have been unsatisfied with the release/retention settings that result from your normal skier classification, or if you have some other special concern, you may wish to select lower or higher skier classifications [(Type -I) or (Type III+)] or select skier type designations that are different for twist and forward lean. Mention your dissatisfaction to your binding technician.

**(Type -I)** is for skiers who desire lower release/retention settings than Type I and will further increase the risk of inadvertent binding release in order to gain increased releasability in a fall.

**(Type III+)** is for skiers who desire higher release/retention settings than Type III and will further decrease releasability in order to gain decreases risk of inadvertent binding release.
